Software Engineer with 4+ years of experience developing scalable mobile, backend, and web applications across logistics, ERP, transportation, and enterprise systems. Experienced in Flutter, Android Native, Spring Boot Microservices, Next.js, OCR, AI-powered automation, and cloud-based services such as Firebase. Passionate about building maintainable software architectures, improving system performance, and delivering high-quality products in Agile environments.

Software Engineer • Mobile Developer • Full-Stack Developer

EDUCATION

BSc in Information Engineering – Gadjah Mada University

August 2021 - October 2025

- GPA: 3.61/4.00 (154 credits)
- Teaching assistant: Single and Multivariable Calculus and Basic Programming Lab Assistant
- Assisted in several research projects:
 - Netra: A tool for measuring the length of toll road concrete cuts – contributed to the development of its monitoring application.
 - Undergraduate thesis & research: Developed an Android-based application for UWB-based self-localization to support real-time position tracking.

WORKING EXPERIENCES

Technical Consultant (Mobile), PT. Altitude Solutions

December 2025 – Present

Full-Time

- Developed a Flutter-based driver application for a large-scale logistics and transportation ecosystem, integrating backend services and Firebase Cloud Messaging (FCM) to deliver real-time operational notifications.
- Refactored legacy POS (Point of Sale) and Asset Management systems, improving maintainability, code quality, and overall application performance.
- Designed and developed scalable Microservices using Spring Boot to support modular enterprise system integrations and improve backend scalability.
- Contributed to the development of multiple ERP modules using Spring Boot for backend services and Next.js for frontend applications, supporting various operational and business workflows.
- Built an AI-powered invoice and receipt processing system utilizing OCR technologies to automate document scanning, information extraction, and validation.
- Designed and implemented an AI-powered Telegram Bot that assists support management teams by automating ticket categorization, generating AI-assisted responses, and streamlining customer support workflows.

Tech Stack: Flutter • Dart • Spring Boot • Java • Next.js • Firebase • FCM • OCR • AI • REST API • PostgreSQL • Git

Website Administrator, Innovative Academy UGM

August 2025 – December 2025

Part-Time

- Redesigned the official Innovative Academy website, improving user experience, accessibility, and design consistency.
- Managed website content and maintained publication workflows to ensure up-to-date organizational information.
- Supported innovation events by coordinating technical logistics and startup masterclass sessions.

Tech Stack: WordPress • Figma

Android Developer, Aino Indonesia

February 2025 – April 2025

Freelance

- Contributed to Project Acasia, the Android-based ticketing system deployed on TransJakarta buses.
- Migrated local databases using Room to improve data consistency and application maintainability.
- Implemented device utility features including Open Settings, Folder Access, and administrative tools to improve usability for operators.

Tech Stack: Android • Kotlin • Room • GPS • MVVM • REST API

Mobile Developer, PT. Divistant Teknologi Indonesia

Fulltime

September 2023 – December 2024

- Developed a Flutter application providing airport information, flight schedules, and passenger services integrated with Angkasa Pura systems.
- Built internal employee experience applications using Flutter while collaborating closely with backend teams.
- Designed CI/CD pipelines using Jenkins and Fastlane to automate mobile application deployment.
- Developed customer dashboard web applications using Nuxt.js, Tailwind CSS, and REST APIs.
- Integrated GraphQL APIs and implemented scalable Flutter architecture following Clean Architecture principles.
- Implemented Firebase Crashlytics to improve application monitoring and production issue tracking.

Freelance

June 2022 – December 2022

- Developed a native Android app for merchants in the laundry project, an application to receive laundry orders.
- Implemented several Android features and libraries such as Room, Google Maps API, QR Scanner, and Bluetooth printer.
- Implemented Firebase Crashlytics to monitor app crashes and statistics.

Tech Stack: Flutter • Dart • GraphQL • Firebase • Jenkins • Fastlane • Nuxt.js • Tailwind CSS

Android Developer Assistant, Department of Electrical and Information Engineering UGM

February 2023 – August 2023

Part-Time

- Developed and maintained Android applications supporting IoT-based concrete cutting depth analysis for toll road infrastructure projects.
- Collaborated with backend engineers and IoT teams using WebSocket communication for real-time data synchronization.

Tech Stack: Android • Kotlin • WebSocket • IoT

PROJECTS

ARCIBO: Augmented Reality Civil Block ([s.id/ARCIBO](#))

Team Lead and Mobile Developer

Januari - September 2024

- Led the development of an educational Augmented Reality mobile application for traditional Indonesian houses.

- Implemented AR experiences, quizzes, and user activity tracking.
- Built using Flutter, Firebase, BLoC, Cubit, and GetIt.

Skills: Flutter • Firebase • AR • BLoC • Cubit

MAHEZZA: Mental Health Puzzle Game (s.id/MAHEZZA)

Mobile Developer

Januari - December 2023

- Developed a native Android application promoting children's mental health through interactive puzzle games.
- Implemented MVVM architecture and Firebase services including Authentication, Firestore, Storage, and Crashlytics.

Skills: Android • Jetpack Compose • Firebase

Toko Management System (s.id/TokoManagementSystem)

Android Developer

September 2022 – December 2022

- Developed a POS application for traditional grocery stores featuring barcode scanning, cashier functionality, inventory management, and Bluetooth receipt printing.

Skills: Android • Room • Firebase

Paragraph (s.id/Paragraph)

Android Developer

October 2021 – November 2021

- Developed a social reading platform enabling users to create, share, and discover short-form articles.

Skills: Android • Firebase

SKILLS

Languages: Indonesia(Native), English(Intermediate)

Programming Languages

Java • Kotlin • Dart • JavaScript • TypeScript • Python • SQL • PHP • HTML • CSS

Mobile Development

Flutter • Android SDK • Jetpack Compose • MVVM • Clean Architecture • BLoC • Cubit • GetIt • REST API • GraphQL • Firebase • Room • Hive • Material Design • Supabase

Backend Development

Spring Boot • Node.js • Java • Microservices • RESTful API • JWT Authentication • Spring • PostgreSQL • MySQL

Frontend Development

Next.js • Nuxt.js • Tailwind CSS • Bootstrap

AI & Automation

OCR • OpenAI API • Prompt Engineering • Telegram Bot API • AI Automation • Document Processing

DevOps & Tools

Git • GitHub • GitLab • Fastlane • Firebase Crashlytics • Firebase Analytics • Figma • Postman • Android Studio • Visual Studio Code

COURSE & CERTIFICATIONS

- **Junior Mobile Programmer** October 2022
Badan Nasional Sertifikasi Profesi, Credential ID: 620192514200042022
- **Junior Mobile Programmer (Course)** July 2022 – October 2022

- Vocational School Graduate Academy, Digital Talent Scholarship
 ● **Java Basic** October 2021
 HackerRank, Credential ID: 316BDFA65564
- **Belajar Membuat Aplikasi Flutter untuk Pemula** July 2021
 Dicoding Indonesia, Credential ID: 2VX32W8G4PYQ

HONOR & AWARDS

- **Passed Program Kreativitas Mahasiswa (PKM) Funding PKM-K 37th (Kewirausahaan) Scheme**
 April 2024 – August 2024
 Issued by Pusat Prestasi Nasional (Pusprenas) as Chief of Technology and Executive Officer.
- **Finalist at Pekan Ilmiah Mahasiswa Nasional (PIMNAS) 36th PKM-K (Kewirausahaan) Scheme**
 December 2023
 Issued by Pusat Prestasi Nasional (Pusprenas) as Chief Technology Officer.

ORGANIZATION & VOLUNTEER

- Staff of Night Login Application Development(NADC), Night Login** Jan 2024 - December 2024
 IT community and organization in DTETI UGM.
- Treasurer, FindIT! 2023** May 2023
 Webinars and Information Technology Competition held by KMTETI UGM.
- Treasurer, FindIT! 2022** May 2022
 Webinars and Information Technology Competition held by KMTETI UGM.
- Member of Google Developer Student Club (GDSC) UGM** November 2021 – June 2022
 Various trainings on technology followed by working on projects with the team.
